Step by Step - Deployment ML II

Setup

1. [Download and install python in your laptop](#) (Note: install python version **3.9.7**)
2. [Download and install visual studio code](#)
3. [Download requirements.txt di Github Ari](#), save in your working directory.
4. [Download the get-pip.py](#) and open your terminal and type **python get-pip.py**
5. Go to your visual studio code, open terminal and write **pip install pipenv**
6. After that write **pipenv shell** atau **pipenv run**
7. Write **pipenv install -r requirements.txt**
8. Enjoy coding streamlit

Coding

1. Buat kode "app.py", save.
2. Run di terminal: streamlit run app.py
3. Coba streamlit di browser
4. Close streamlit di browser, close terminal di VS Code
5. Lanjut koding ml_app.py
6. Jalankan streamlit run app.py di terminal

Go Live

1. Buka github.com, login
2. Create new repository, beri nama
3. Upload semua file terkait, lalu commit
4. Buka share.streamlit.io, login
5. Connect github account
6. Create new app, connect ke repository github, deploy.
